

Need A Better Logistics Solution?

**Learn How Veritap Can Make Your Supply Chain More Efficient
And Secure With Blockchain And NFC Technology**

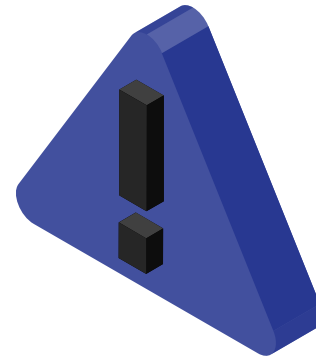

Veritap Is an Easy-To-Use NFC Track-And-Trace Solution Encompassing the Entire Supply Chain, from End to End

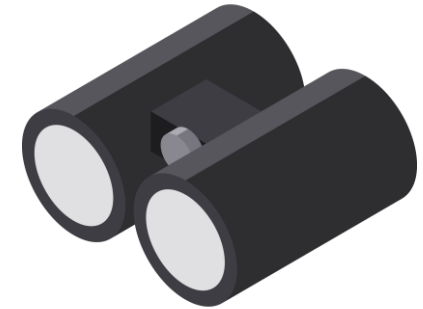

Digital transfer of document ownership - no more paying for couriers for Bills of Lading, Invoices, etc.

Proof of **location**, **temperature**, **ownership**, and other conditions.

Prevent import of counterfeits through digital proof of authenticity.

Prove that **damage** did not happen in your custody.

Common Problems That We Solve

ISSUES

CAPABILITIES

Exposure in Transit

Temperature Monitoring

Tampering, Counterfeiting

Secure Authentication

Traceability

Tracking Point-To-Point

Exception Management

Real-Time Alerts For Rapid Response

Data Integrity

Secure Encryption & Blockchain Digital Mirror

Safeguard Your Business

Prevent mishandling & damage by providing special instructions for carriers. Log shipment condition per location & handler.

Reduce product loss and waste with temperature and status tracking.

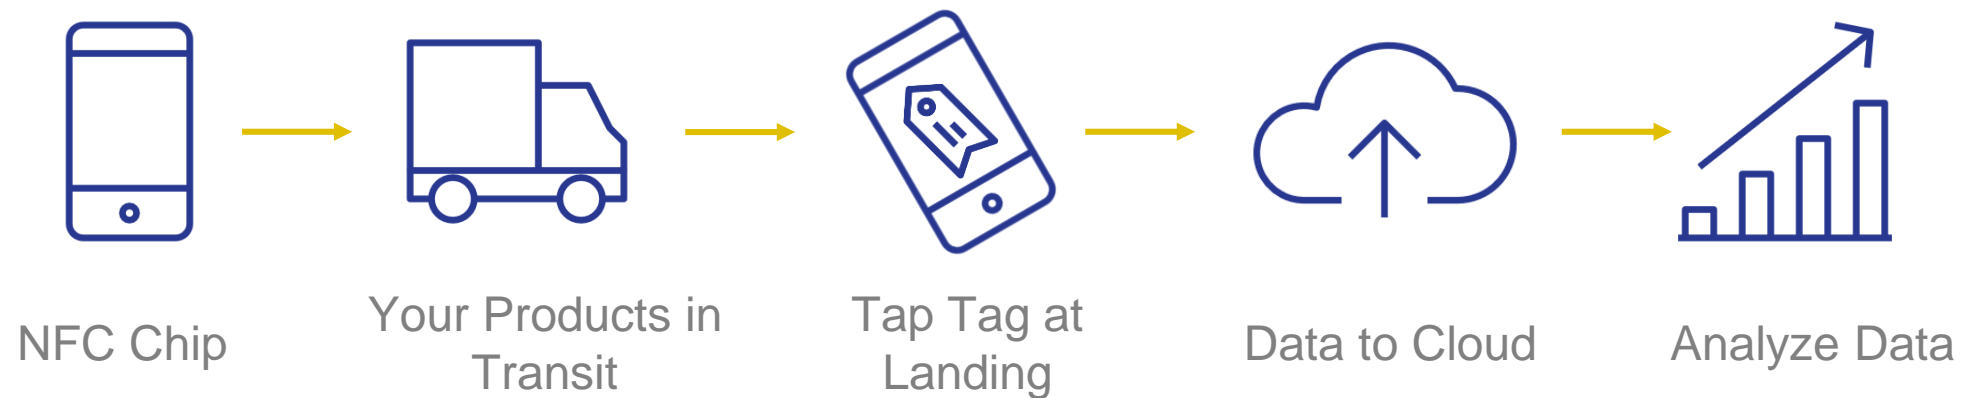

Protect brand equity via consistent product quality. Guard against product tainting and counterfeiting.

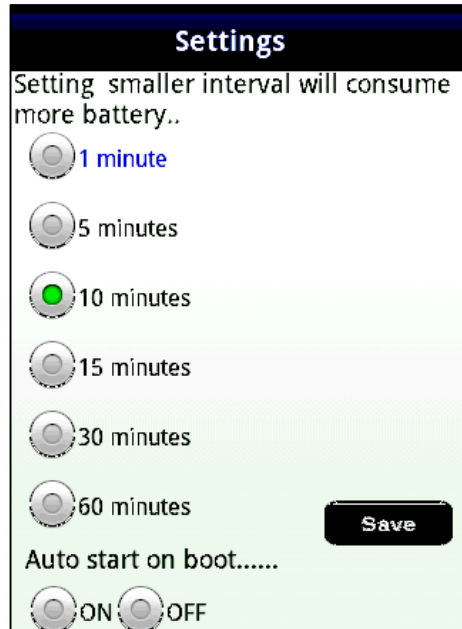

Collect data for insurance claims in worst case scenarios.

How It Works

Manage all your shipments and documents right from your NFC-enabled smart phone, with all your data securely stored and accessible from the cloud.

Easy To Use

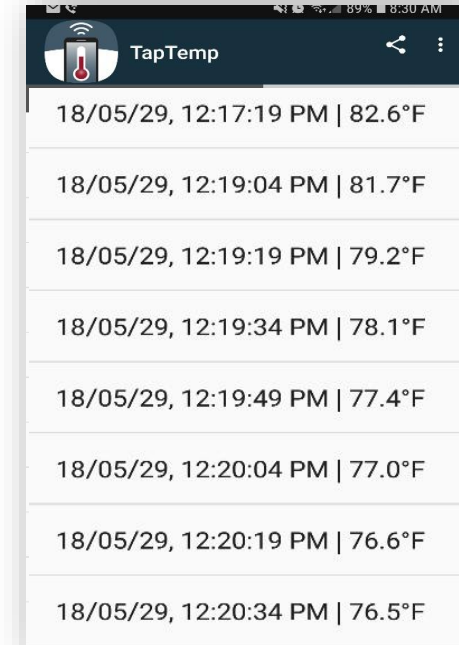

SET

Set Protocols, Schedules and Triggers to ensure authenticity and compliance.

TAP

Touch smartphone to NFC labels to update/retrieve info and update status.

SEE

Get alerts, see exceptions. Proactively monitor activities so issues can be addressed quickly.
