GTX CORP — With You®

Wearable / Attachable Beacons for Proximity Monitoring

Designed for enterprises with people and assets in motion, such as hospitals, oil rigs, mines, factories, schools & assist. living facilities.
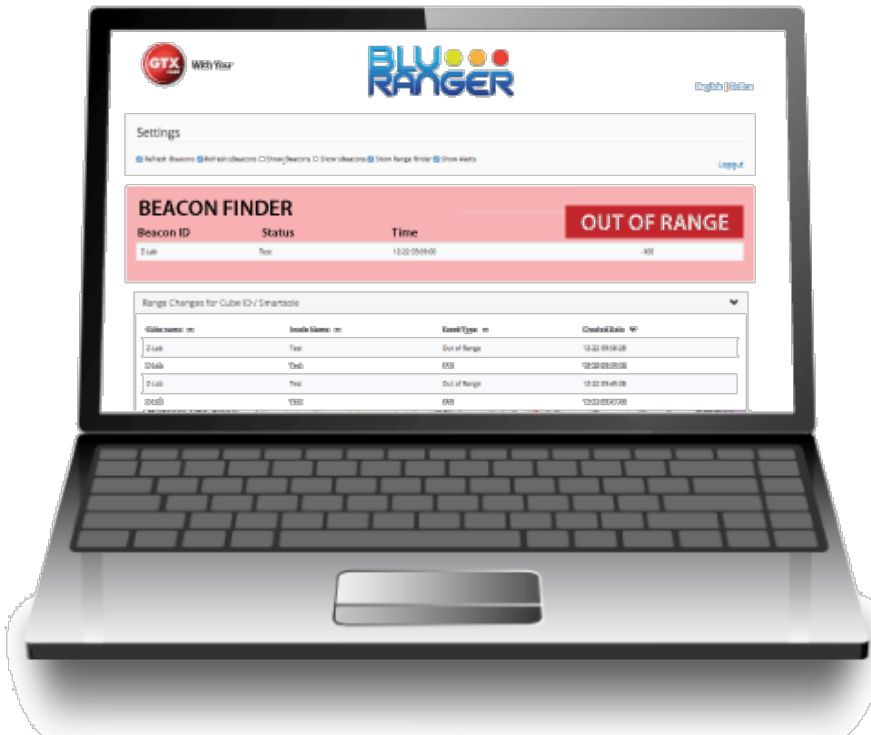

The BluRanger System

Bluetooth / Wifi Hubs Identify the Location of Mobile Beacons and Send the Data to an Online Portal

Blue tooth/ Wifi Hubs

Online Data Logging
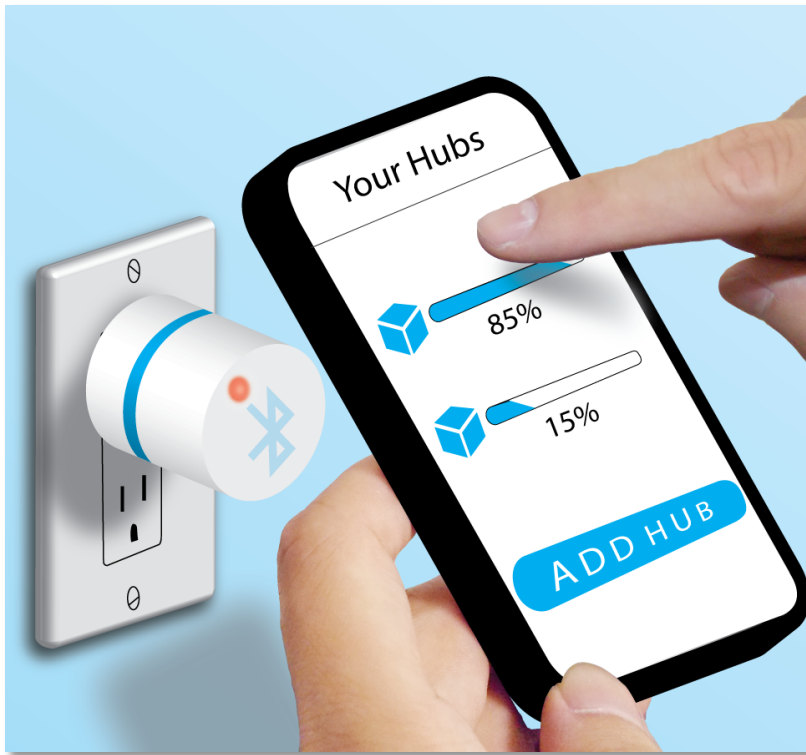

Beacons

Beacon Finder & Analysis

Location Monitoring Portal

Easy to use IOT based viewing portal allows authorized personnel to see where any person or device is located within the designated facility at any time.

○ Monitor patients, visitors, staff and valuable assets.

○ Plug in and go. Low cost and easy to deploy.

○ No battery charging

○ Disposable version of BLE beacon available for short term use such as patients and visitors.

Bluetooth Low Energy (BLE) & Wifi Hubs

o BLE devices work with smartphones to pair with plug-in hubs (wifi gateways)

o Beacons continually transmit a short-range signal, which when detected by hubs affirms the beacons location.

o Each room has its own hub which reports to the portal which beacons are nearby.

BLU RANGER

Multiple & Versatile Beacons

WEARABLE

Pendants, Buttons, Broaches, Lanyards/NameTags, Wristbands (water resistant or disposable)
